Research Interests

My research aims to develop assistive and trustworthy AI and machine learning systems grounded in an understanding of human perception, cognition, and action. I am particularly interested in identifying and mitigating modality-specific and social biases in vision-language models, using a mechanistic interpretability framework to uncover the internal representations and decision-making processes that give rise to biased behaviors.

Education

Korea Advanced Institute of Science and Technology (KAIST)

Seoul, South Korea

DOCTOR OF PHILOSOPHY IN ARTIFICIAL INTELLIGENCE, GPA: 4.13/4.3

Feb. 2028 (Expected)

- Advisors: Prof. Hyunjung Shim (2024-Current) and Dr. James Thorne (2023-2025)

University of Seoul

Seoul, South Korea

BACHELOR OF SCIENCE IN MATHEMATICS, GPA: 4.29/4.5

Feb. 2022

- Summa Cum Laude (Received academic excellence or Mayor's scholarship for every semester)

Skills

Language Python, MATLAB, R, C++, JavaScript
Certification Society of Actuaries (P, FM, and SRM)

Experience

KAIST

Seoul, South Korea

RESEARCH ASSISTANT

March 2023 - PRESENT

- Nominated for Apple PhD Fellowship program (3 students per institution)
- Ministry of Science and ICT Project: Contributed leadership to a national project aimed at developing socially unbiased generative models.
- Basic Research Lab Project: Co-led a national project on developing barrier-free AI systems in educational and mobility domains.
- Published six first-author and three co-authored Top-tier works, with research centered on fairness and human-centered ML systems.

University of Copenhagen

Copenhagen, Denmark

VISITING RESEARCHER

March 2025 - May 2025

- Received a Danish Data Science Academy grant to advance research on explainability and reliability in multimodal models to build fairness-aware ML systems.
- Developed a neuron-level bias mitigation framework for VLMs and LVLMs with Dr. Yoonna Jang, in collaboration with the NVIDIA Taiwan team (Dr. Yusuke Hirota and Dr. Ryo Hachiuma).

Korea Institute of Science and Technology (KIST)

Seoul, South Korea

RESEARCH INTERN

Oct. 2022 - Feb. 2023

- Analyzed human perceptual limits and ML model performance under severely low-resolution visual conditions.
- Developed a reinforcement learning-based framework that emulates the learning effects frequently occurring in human psychophysical tests.
- Built an automated imaging pipeline for detecting fluorescence-image edges and identifying hyperpolarization phenomena with high precision.

University of Seoul

Seoul, South Korea

RESEARCH INTERN

Sep. 2020 - Dec. 2020

- Investigated district-level Covid-19 risk factors across Seoul and awarded 3rd place (out of 40+ teams) in a competitive big-data competition.
- Developed a hybrid CNN-RNN model to classify the progressive stages of pulmonary nodules from sequential CT scan slices.
- Analyzed YouTube channel performance to model subscriber trajectory and provided targeted strategies for subscriber acquisition.

Working Projects

Large Vision-Language Models for Blind and Low-Vision Individuals

- Built metrics to improve BLV-model evaluation scoring alignment (VLM: [arXiv:2502.14883](#), LVLM: [arXiv:2510.00766](#)).
- Planning to develop a lightweight, real-time LVLM evaluator for deployment in assistive applications for BLV users.

Multilingual Referring Image Segmentation

- Developed a training-free framework that leverages untapped spatial knowledge in VLMs to enhance zero-shot RIS ([arXiv:2509.23098](#)).
- Extending the framework to a multilingual VLM encoder to enable zero-shot RIS across diverse languages and linguistic structures.

Service

Talks

- AI Tutorial Series at KAIST AI (Winter 2025).

Volunteer

- Provided on-site support for EMNLP conference (2023).
- Contributed to community support and educational outreach in Cambodia in Summer 2018.

Leader

- Lab representative student from March 2024 to Aug. 2025.
- Appeared in the KAIST AI promotional video (2024) and top-10 research achievements participant (2023).
- Lab research manager from Aug. 2023 to Dec. 2023.

Teaching Assistant

- Department Seminars & Colloquia, Fall 2023
- Computational Image Generation and Modification, Fall 2025

Mentor

- Led research mentorship for two Azerbaijan undergraduate students in South Korea from Sep. 2024 to Jan. 2025.
- Provided English and mathematics tutoring to Dongdaemun-gu (Seoul, South Korea) high school students in Fall 2019 and Winter 2020.

Reviewer

- IEEE Transactions on Audio, Speech and Language Processing 2025 and 2026
- ICLR RSI Workshop 2026
- ACL ARR February, May, July, October 2025, January 2026
- ACL Student Research Workshop 2025
- IJCNN 2024, 2025, and 2026
